

Data Loader

"Data Loader" feature of Caph Framework is to handle resource data of a Web App and preloading it for later use. It's to reduce loading time (response time) of a Web application.

- "Data Loader" is a part of DAL. DAL means Data Acceleration Library.
- So, all classes in "Data Loader" feature use the "caph.dal" namespace.

caph.dal.BaseLoader

This document is to explain caph.dal.BaseLoader.

caph.dal.EventHandler

This document is to explain caph.dal.EventHandler.

caph.dal.Preloader

This document is to explain caph.dal.Preloader.

caph.dal.TagLoader

This document is to explain caph.dal.TagLoader.

caph.dal.XHRLoader

This document is to explain caph.dal.XHRLoader.
