

createCommonDir

Published 2014-10-28 | (Compatible with SDK 2.5,3.5,4.5,5.0,5.1 and 2010,2011,2012,2013,2014 models)

Creates directories in the file input/output area.

The createCommonDir class creates directories in the file input/output area.

createCommonDir	
Syntax	fileSystemObj.createCommonDir(directoryPath);
Parameter	directoryPath (String) path including the name of a directory to create
Return Value	Boolean
Remarks	Create a directory named curWidget.id to avoid crash between file names in other applications.
Example	<pre>var fileSystemObj = new FileSystem(); var bResult = fileSystemObj.createCommonDir(curWidget.id);</pre>
Enumeration	None
