

RECOGNITION

This class checks the Recognition support. You should check whether the recognition is supported or not.

Add the following line for recognition class into a html file your own :

```
<script type="text/javascript" src="$MANAGER_WIDGET/Common/webapi/1.0/deviceapis.js"></script>
```

You can declare recognition class like this :

```
ex) var recognition= deviceapis.recognition;
```
