

# UI(AppsFramework)

Published 2014-10-28 | (Compatible with SDK 3.5,4.5,5.0,5.1 and 2012,2013,2014 models)

UI

**\*\*This class will not be supported in 2015.**

*All functionalities of AppsFramework are more improved, integrating with CAPH. Therefore Appsframework is not supported since 2015 Smart TV. To use functions of Appsframework, refer to [here](#).*

A well-designed UI (user interface) is important for a good user experience. When designing and coding your application UI, consider the following:

[Initializing UI Components](#)

[Customizing UI Components](#)

Samsung Smart TV provides the following tutorials to demonstrate how to work with UI components:

[Tutorial: Creating New UI Components](#)

[Tutorial: Adding a Visual Custom Component](#)

When designing your UI, you may also wish to use a [scene-based architecture](#).

You can get more information about working with CSS, handling images and creating a scroll bar in the [UI](#) section in [JavaScript](#).
